

CI Processing Strategies

```
graph TD; A[CI Processing Strategies] --> B[Explicit Methods<br/>spectral cues]; A --> C[Implicit Methods<br/>temporal envelopes<br/>& fine structure]; C --> D[Incoherent Methods<br/>time-invariant]; C --> E[Coherent Methods<br/>signal dependent<br/>time-variant];
```

This flowchart illustrates the classification of CI Processing Strategies. It begins with a top-level box labeled 'CI Processing Strategies'. Two arrows point down from this box to 'Explicit Methods spectral cues' and 'Implicit Methods temporal envelopes & fine structure'. From the 'Implicit Methods' box, two more arrows point down to 'Incoherent Methods time-invariant' and 'Coherent Methods signal dependent time-variant'.

Explicit Methods
spectral cues

Implicit Methods
temporal envelopes
& fine structure

Incoherent Methods
time-invariant

Coherent Methods
signal dependent
time-variant
